From the Wadi Rum visitor's center, we will split up in jeeps and dive into the desert, past sand dunes and incredible rock formations before entering our Bedouin camp for the night.

09 Sep: Wadi Mujib and Amman

After breakfast in our camp, we will drive to the Wadi Mujib gorge, where the Mujib River runs through. This unique nature reserve is home to more than 100 species of birds and animals like the nubian ibex, hyena, jackal, wolf and Arabian leopard to name a few.

We will embark on a 2-hour hike on the Siq trail and follow the course of the river, wading through the water, up to the base of a large waterfall. Along the way, we'll climb several smaller waterfalls with the help of fixed ropes and ladders.

After all the hard work, we will float peacefully back out of the canyon on the river, and take time to soak in the surroundings.

We will head to Amman in the afternoon where we check into our hotel.
